TEMPbadge® Visitor Management System

TEMPbadge®
Visitor Management Software

ENTRY LEVEL VISITOR MANAGEMENT SOFTWARE SYSTEM

Quick, easy-to-use software for managing your visitor care

Rapid visitor processing in just 5 quick seconds!

- *Ensures a quick and painless sign-in process for visitors*

- *If implementing a visitor management system for the first time, the efficiency of the sign-in process puts to rest the theory that managing and badging visitors creates long lines and bottle necks*

*Easy-to-navigate interface that requires little to no training*

- *There is a small learning curve as the software is convenient for first-time users and office personnel, too*

Customization options for pass types, departments and more

- *Allows the system to be customized based on the needs of your facility*

Reports available based on date, destination, or pass type

- *Can be used as a tool to investigate incidents that occur within the facility*

- *In the event of an emergency or evacuation, the reports give a detailed account of the number of visitors in the facility and their intended destinations, departments and more*
